**Alberta**

- Mandatory, provincewide restrictions are in effect to protect the health system and slow the spread of COVID-19.
- Federal proof of vaccination is still required for federally regulated travel, like air travel.
- A rising risk level should lead to stronger public health measures.
- Essential services will remain available, including hospitals, long-term care facilities, and home care.
- Health care staff will wear masks in all settings.
- Travel within the province between different health regions is not restricted.
- People are encouraged to stay home if they are sick.
- Large gatherings are limited to 10 people.
- Indoor mask requirements are lifted for large gatherings of people.

**British Columbia**

- Universal mask requirements remain in effect in public indoor settings.
- People are expected to follow all public health orders to protect the health system and slow the spread of COVID-19.
- Large gatherings are limited to 10 people.
- Indoor mask requirements are lifted for large gatherings of people.
- People are expected to follow all public health orders to protect the health system and slow the spread of COVID-19.

**Manitoba and Remote Communities**

- The Manitoba government has lifted all remaining public health orders, including indoor mask requirements.
- Federal COVID-19 testing and vaccination requirements remain in effect for air travel.
- Mask requirements have been lifted for indoor public places in Manitoba.
- International travellers arriving into Canada must comply with federal COVID-19 testing and vaccination requirements.
- Manitoba has recently terminated the Order Prohibiting Travel to Northern Manitoba and Remote Communities.
- Manitoba is currently under the Limited Risk level.

**Canada’s Federal Jurisdiction**

- The Federal government has lifted all remaining public health orders, including indoor mask requirements.
- The Health Canada website provides up-to-date information on public health measures and guidance for travellers.
- The federal government continues to recommend the use of face masks in public indoor settings.
- Travelers are encouraged to check the latest public health guidance before their trip.

**Canada’s Provincial Health Authorities**

- Provinces and territories are responsible for implementing public health measures to control the spread of COVID-19 within their jurisdictions.
- The levels of risk vary across the country, and restrictions are lifted or implemented based on the current situation.
- Public health orders and recommendations are continually updated to reflect the evolving nature of the pandemic.
- People are encouraged to monitor local news and public health websites for updates on restrictions and guidance.

**COVID-19 Measures, Updates, and Guidance Issued by Transport Canada**

- Updates and guidance for air travel are available on the Transport Canada website.
- Air travelers are encouraged to check the latest public health guidance before departure.
- Foreign nationals who are not permanent residents of Canada are not allowed to enter the country.
- The government continues to recommend the use of face masks in public indoor settings.
- Travelers are encouraged to check the latest public health guidance before their trip.

**Medical Masks**

- The use of masks is recommended in public indoor settings to prevent the spread of COVID-19.
- Masks are encouraged on public transportation and in public places.
- Toilet paper, gloves, hand sanitizers, and face masks can be found in public washrooms.
- Masks are provided in the case of an emergency.
EC2022-176 has not been renewed. [March 12, 29-Aug-22]

"The Government of Yukon is reviewing the Civil COVID-19 Situation Update: Quebec is no longer under a public health state of emergency throughout the province of Quebec. It is addressed to employers and workers in all economic sectors to support them in their management of health and safety.

Proof of Vaccination no longer required for people working in high-risk settings. The public health order requiring mandatory indoor masking and self-isolation for anyone who tests positive for COVID-19 through a PCR or at-home rapid test is no longer in effect.

The following is a collection of COVID-related guidance documents from multiple sources. These documents provide information and support for businesses and organizations during the COVID-19 pandemic.

General guidance for businesses and organizations: COVID-19 workplace health and safety [June 4, 2021]

The CNESST proposes a toolkit to aid workplaces in managing the COVID-19 pandemic. It is addressed to employers and employees to support them in their management of health and safety.

The Toolkit proposes a set of tools to help workplaces plan and manage the COVID-19 pandemic. It includes a plan to ensure the health and safety of all individuals in the workplace, including measures to prevent the spread of the virus, and to mitigate the effects of the pandemic on the workplace.

The toolkit is designed to help workplaces develop a comprehensive strategy to ensure the health and safety of all individuals in the workplace. It provides guidance on how to identify and assess risks, and how to develop and implement strategies to prevent the spread of the virus.

The toolkit is available online and includes a guide to the toolkit, a risk assessment template, a risk management plan, and other tools and resources.

The toolkit is regularly updated to reflect the latest developments in the COVID-19 pandemic. Updated daily, it is available for download from the website.

The toolkit is designed to be adaptable to the specific needs of each workplace, and can be used as a starting point for developing a comprehensive strategy to ensure the health and safety of all individuals in the workplace.

The toolkit is freely available to all workplaces, and can be downloaded from the website.

The toolkit is designed to be used by employers and employees, and can be used by all individuals in the workplace.

The toolkit is available in multiple languages, and can be translated to meet the needs of different workplaces.

The toolkit is designed to be accessible to all individuals in the workplace, and can be used by all individuals in the workplace.

The toolkit is regularly updated to reflect the latest developments in the COVID-19 pandemic, and is available for download from the website.
